Bachelor's degree in Computer Engineering from the Federal University of Ceará (UFC), Fortaleza campus. Background in software development, including game development with C#, object-oriented programming in C++, and experience with Python and C.

Education

- **Federal University of Ceará** **Fortaleza**
Computer Engineering *2018–2024*

Work experience

- **Digital Experience Laboratory - LED**
 - Lead Programmer* *March 2025 - March 2026*
 - Developed the immersive WebAR experience *Ventos da Liberdade* using 8thWall, including implementation of interactive logic and synchronization of narrative modules *De Matilde para Chico* and *Ecos dos Dragões*
 - Programmed navigation systems and event-driven narrative progression based on user interaction
 - Integrated audio, animations, and visual elements to build an augmented reality experience
 - AR Programmer* *September 2024 - March 2025*
 - Developed the WebAR experience *Luzes do Tempo* using 8thWall, implementing interactions for the digital hourglass interface
 - Programmed interactive logic and navigation between temporal layers in browser-based augmented reality
 - Integrated visual and narrative content optimized for mobile devices without requiring app installation
 - VR Programmer* *April 2024 - September 2024*
 - Developed the virtual reality experience *Arquitetura Fantasma – Palácio Plácido* using Unity
 - Implemented navigation between different temporal layers of Praça Luíza Távora
 - Programmed movement and interaction systems in immersive 3D environments
 - Integrated historical 3D reconstructions and controlled transitions between experience states
- **The Guardian Dog Studio - Junior Game Company**
 - Lead Programmer* *October 2021 - March 2022*
 - Development of the artificial intelligence model and logical instructions for the mechanics of the game *Call of The Racket*. Results enabled automated decision-making for opponents and the modeling of projectile trajectories in the game.
 - Training new company collaborators in basic game programming using C#.
 - Development Producer* *April 2021 - October 2021*
 - Analysis of technical feasibility for new projects and allocation of development teams within the company.
 - Cost estimation and scheduling for 5 development projects.
 - Programmer* *April 2020 - April 2021*
 - Development and implementation of logical instructions for the game *Super Gattai* that allowed the enemy to make decisions regarding which movement to use.
 - Development and implementation of logical instructions for the Battle part of the game *Super Gattai*, including attacks, defense, and special moves.

- **Federal University of Ceará**
 - *Undergraduate Course Mentoring* *August 2018 - December 2019*
 - Mentoring in the courses "Fundamentals of Programming," "Data Structures," and "Object-Oriented Programming," dedicating approximately 12 hours per week.
 - Clarification of students' doubts during classes, private tutoring sessions, and assistance during breaks.

Academic Projects

- **Fundamentals of Digital Image Processing - Course**
 - *Image Preprocessing Manager* *August 2022 - December 2022*
 - Developed algorithms for preprocessing images of Cowpea seeds to determine seed viability in the *TetraSeed* classification program.
 - Identified and separated seeds in an image, applying necessary enhancement filters for improved classification of seed viability.

Awards and Honors

- **Ceará Game of the Year 2020:** *Super Gattai*, Cearense Gamers Union (UCEG).

Skills

- **Programming Languages:** C, C++, C#, Python (Advanced); Assembly, Java (Basic).
- **Industrial Software Skills:** Unity3D, Blender (Intermediate); Unreal Engine, Proteus (Basic).
- **General Business Skills:** Strong presentation skills, teamwork abilities, familiarity with administrative and human resources processes, good communication.
- **Language Proficiency:** Portuguese (Fluent); English (Intermediate); Spanish (Basic).
- **Other:** Linux (Intermediate).

Courses and Trainings

- **3D Game Development with Unity 2017 + 2018:** Udemy, 32h (April 2020).
- **Sound Design for Video Games:** Udemy, 3h (March 2020).
- **Design Patterns with SOLID:** Udemy, 2h (December 2021).
- **MasterClass — MACHINE LEARNING Algorithms:** Udemy, 4h (December 2022).
- **Fundamentals of Deep Learning:** NVIDIA, 8h (October 2025) .
